

Hazardous decomposition products (including combustion products):

Incomplete combustion produces carbon monoxide and other toxic substances.

Hazardous Polymerization: _____ May occur ☒ Will not occur

Conditions to Avoid: None known.

VII. SPILL, LEAK AND DISPOSAL PROCEDURES

Spill response procedures (include employee protection measures):

All sources of ignition should be removed. Provide good ventilation. Soak up spill with absorbent material and shovel into steel pail or drums. Wash down residues and flush to sewer with plenty of water. Person performing this work should wear adequate personal protective equipment and clothing.

Preparing wastes for disposal (container types, neutralization, etc.):

No special procedures required. Consult local authorities.

Note: Dispose of all wastes in accordance with federal, state and local regulations.

VIII. SPECIAL HANDLING INFORMATION

Ventilation and engineering controls Use adequate local/general ventilation to keep down mist or vapor concentration below applicable standards.

Respiratory protection If adequate ventilation is a problem use NIOSH approved organic vapor respirator.

Eye Protection (Type) Chemical safety goggles.

Gloves (specify material) Neoprene

Other Clothing and Equipment Apron, safety shower and eye wash.

Work practices, hygienic practices Wash hands before handling any food. Avoid eye contact. Avoid repeated skin contact. Use with adequate ventilation.

Other handling and storage requirements Keep container tightly closed. Store away from heat. Sparks, open flames and oxidizers.

Protective measures during maintenance of contaminated equipment Same measures as noted above.

IX. LABELING

Labeling (precautionary statements) Flammable. Use adequate ventilation. Contains Isopropyl Alcohol and other flammable solvents. Keep away from heat, sparks or naked flames. Keep containers closed. Avoid prolonged breathing of vapors and skin contact. Store in cool, dry well ventilated area.
